

CAPABILITIES STATEMENT

Civil construction, mining infrastructure,
plant hire and project delivery across
Australia.

**PROVEN IN REMOTE AND TECHNICALLY
CHALLENGING ENVIRONMENTS**

northernaustriacivil.com.au

Built for demanding projects

A practical, self-performing civil contractor with more than a decade of delivery experience.

Northern Australia Civil (NAC) provides tailored civil construction, mining infrastructure, plant and labour hire, and project management services across Australia.

Our approach combines experienced people, fit-for-purpose plant and responsive project support. We focus on safe execution, practical solutions and strong client relationships to achieve reliable project outcomes.

CIVIL CONSTRUCTION

MINING INFRASTRUCTURE

PLANT & LABOUR HIRE

Delivery capability that scales from specialist support packages to major self-performed works.

Experienced people. Practical support.

People on site and in the office working together to support project delivery.

On-site project delivery

Experienced people focused on safe, productive execution.

Responsive project support

Office support connected to the needs of site operations.

Certified systems. Consistent delivery.

Integrated management systems support quality, environmental responsibility and safe execution.

ISO 9001:2015

Quality management

Structured planning, verification and continuous improvement.

ISO 14001:2015

Environmental management

Controls designed for responsible and compliant project delivery.

ISO 45001:2018

Health and safety

Risk-based systems that support safe work and workforce wellbeing.

Core civil and mining capabilities

Flexible delivery across greenfield, brownfield, remote and operational environments.

Mining & resources

- Mining infrastructure development
- Surface mining support
- Bulk earthworks and drill and blast
- Rehabilitation and water management
- Mining operations
- Tailings dam construction
- Maintenance services

Transport & utilities

- Road and rail construction
- Microtunnelling
- Underground services
- Oil and gas onshore development
- Road freight
- Heavy vehicle transport
- Heavy Haulage
- Traffic control
- Underground service locations

Site development

- Detailed earthworks and excavation
- Clearing and site establishment
- Ground improvements
- Waste management
- Specialist in water storage dams & lining
- Concrete structures
- Drainage
- Material Supply
- Crushing & Screening

NAC tailors plant, people and supervision to suit each package, with a focus on productivity, safe execution and clear commercial accountability.

Plant built for production.

Fit-for-purpose equipment supporting civil construction and mining infrastructure.

Articulated Dump Trucks

Excavators

D10 Dozers with Trimble GPS

**D6 VPAT LGP Dozers with
Trimble Machine control**

Road Train Side Tippers

**150 AWD Graders with
Trimble Machine Control**

Fleet and transport capability.

Tippers, water trucks and service vehicles, supported by transport equipment.

8x4 Tippers

8x4 Water Trucks

8x4 Service trucks

Drop Decks

50t Floats

5t-75t Excavators

Plant and field support.

Specialist plant, machine control and mobile support for site operations.

6x4 Water trucks

Semi & Double Water Trucks

Compact Track Loaders

Trimble UTS Machine Control

Light Vehicles

Mobile HD Fitters with Service Trailers

Plant, workshop and field service capability

Keeping project fleets productive through practical on-site support.

Mobile workshop facilities

- 24-hour field service support
- Qualified heavy diesel fitters
- Service trucks and experienced servicemen
- Boilermakers and fabrication capability
- Responsive maintenance support for remote operations

A well-supported fleet reduces downtime and strengthens production certainty.

Recent projects across Northern Territory and Western Australia

Experience across mining, defence, transport, rail and remote infrastructure.

NORTHERN TERRITORY

- Bradshaw Field Training Area
- Finniss Lithium Project
- Tiger Brennan Overpass
- Nackeroo Airfield
- Delamere Training Facility
- RAAF Base Tindal
- Garramilla Boulevard
- Darwin Ship Lift
- Tanami Road Upgrade
- RAAF Base Darwin
- Tiger Brennan Drive Duplication

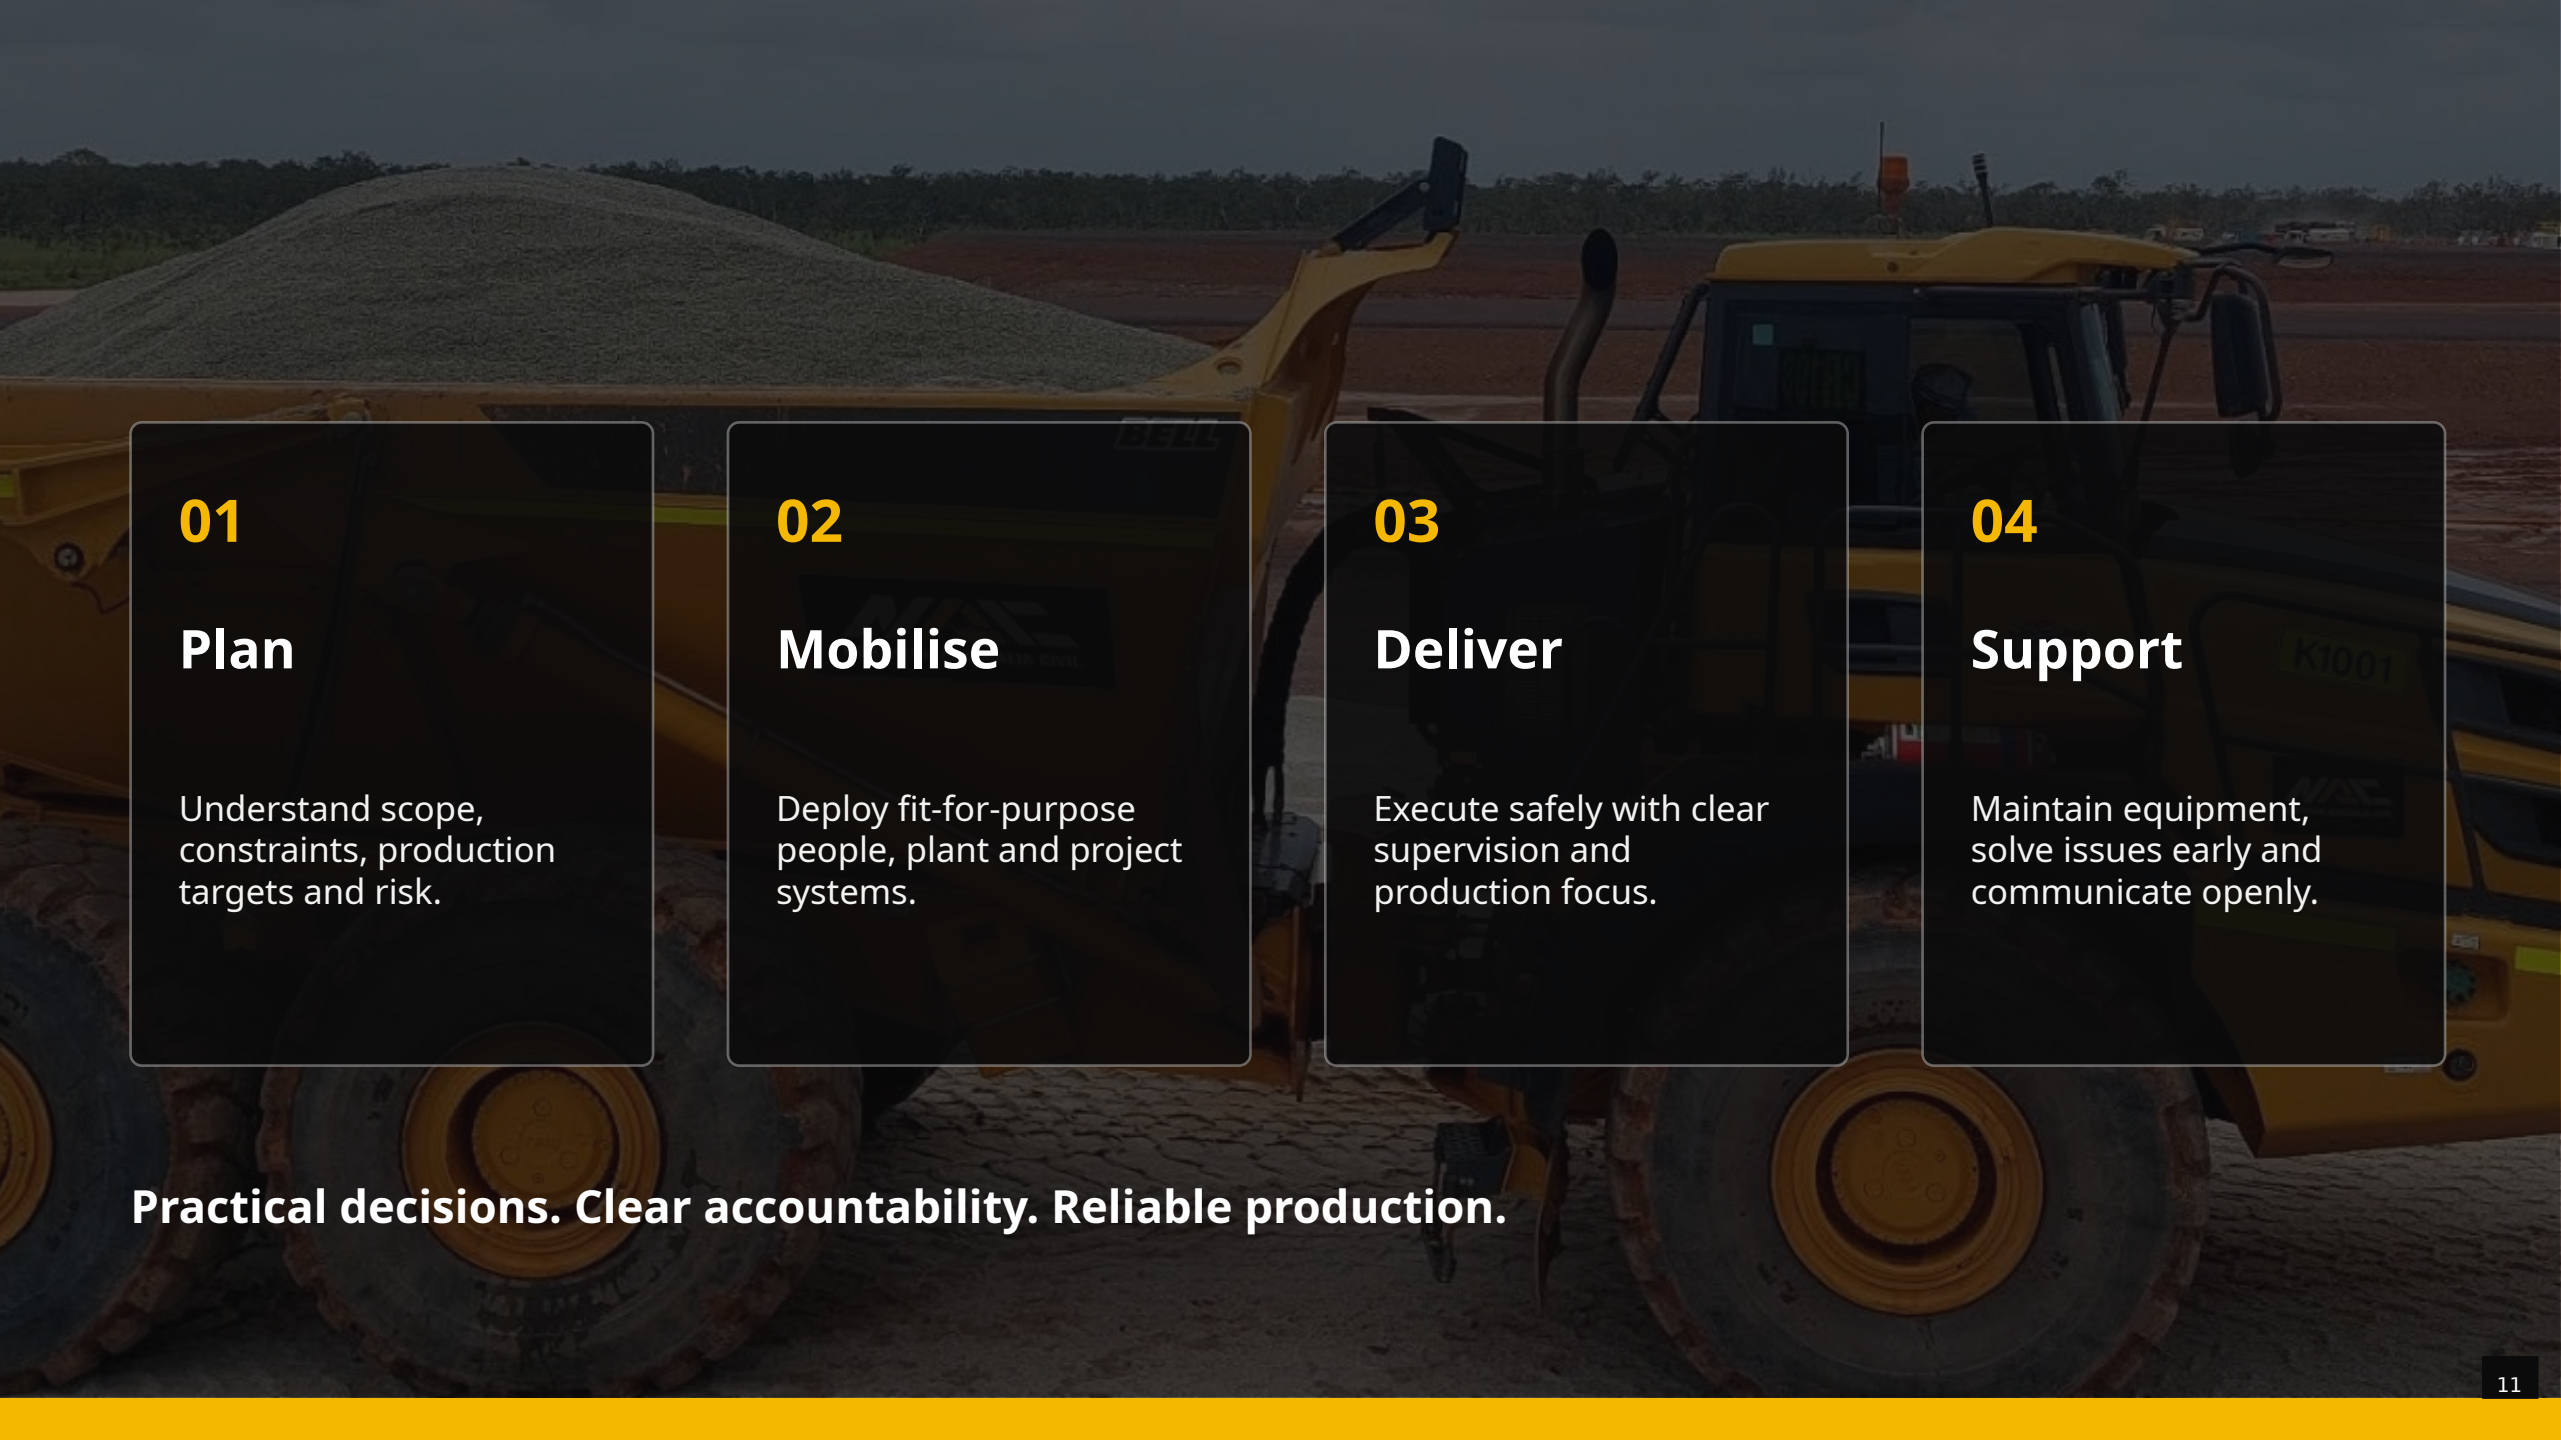

Proven project exposure

Mining | Defence | Roads | Rail | Airfields | Urban civil

WESTERN AUSTRALIA

- Western Range Iron Ore
- Gudai-Darri Rail North
- Gudai-Darri Rail South
- White Quartz Road
- Perdaman Urea Project
- Marble Bar Road
- Rhodes Ridge Project
- West Angelas Sustaining Project

01

Plan

Understand scope, constraints, production targets and risk.

02

Mobilise

Deploy fit-for-purpose people, plant and project systems.

03

Deliver

Execute safely with clear supervision and production focus.

04

Support

Maintain equipment, solve issues early and communicate openly.

Practical decisions. Clear accountability. Reliable production.

Proudly supporting the Starlight Children's Foundation

NAC values the communities in which we work and is proud to support initiatives that make a positive difference.

Community partnership is part of how NAC builds long-term relationships beyond the project boundary.

Let's build the next project together.
